TECHNICAL COMPLETENESS DETERMINATION, DOW CHEMICAL COMPANY,
PITTSBURG CA, EPA ID CAD 076528678

Dear Ms. Galganski:

The Department of Toxic Substances Control (DTSC) has concluded its review of the Dow Chemical Company Permit Application, dated April 2003, revised March 7, 2005, with the Ambient Air Supplement dated June 15, 2007. In accordance with California Code of Regulations, title 22, section 66271.2(c), DTSC finds that your application is complete.

DTSC is concluding its California Environmental Quality Act (CEQA) review and may be ready to public notice the proposed post-closure permit determination and CEQA document in September of 2007. Dow and interested members of the public will then have 45 days to comment on the two proposed documents. Over the next several weeks, and following the public notice period, DTSC may request additional, clarifying information about application details, current site conditions, or potential CEQA issues; however, such request(s) will not render the application incomplete.

Ms. Sandy Galganski
